Contents

Part I **Introduction to Networking Concepts 3**

Chapter 1 Introduction to PC Networking 5

A Brief History of PC Networking 5
The First Communications Networks 6
Disadvantages of Standalone Systems 10
What Is a Network, Anyway? 11
Why Network Computers? 11
Benefits of Getting Connected 12
The Birth of the Internet 13
The Cost of Technology: More and More for Less and Less 15

PC Networking Today 16
Home Computing 16
Web Presence and E-commerce 16
High-Performance Business Solutions 16
Online Learning 17

Tomorrow's Networks 17
"Smart" Appliances and Homes 17
Phoning Home 18
The Wired Workplace 19
Schools of the Future 20
Networking Health Care 20
Technology and the Law 21
Intergalactic Networking? 21

A Brief Overview of Networking Terminology 21
Concept-Related Terminology 22
Network Hardware-Related Terminology 22
Software-Related Terminology 23
Design and Topology Terminology 24
Measurement-Related Terminology 24

What This Book Covers and What It Doesn't 25

Networking Certifications 26
Vendor-Specific Certifications 26
Non-Vendor-Specific Certifications 26
This Book and Certification 27

Summary 27

Further Reading 28

Review Questions 28

Chapter 2 Categorizing Networks 33

Categorizing Networks by Physical Scope 33
- Characteristics of a LAN 34
- Characteristics of a MAN 35
- Characteristics of a WAN 37

Categorizing Networks by Administrative Method 38
- Servers and Clients 39
- Characteristics of Peer-to-Peer Networks 44
- Characteristics of Server-Based Networks 47

Categorizing Networks by NOS 49
- Windows Networks 50
- NetWare Networks 50
- UNIX Networks 50
- Hybrid Networks 51

Categorizing Networks by Protocol 52
- NetBEUI Networks 52
- IPX/SPX Networks 52
- TCP/IP Networks 53
- Other LAN Protocols Used in Networks 53

Categorizing Networks by Topology 54
- Linear Bus Networks 55
- Ring Networks 56
- Star Bus Networks 57
- Mesh Networks 59
- Hybrid Topologies 60

Categorizing Networks by Architecture 61
- Ethernet Networks 62
- Token Ring Networks 67
- AppleTalk Networks 68
- ARCnet Networks 68

Summary 70

Further Reading 70

Review Questions 71

Chapter 3 Networking Concepts, Models, and Standards 75

Computer Communication Concepts 75
The Language of the Machine 76
Common Numbering Systems 76
Using Packets 80
A Layered Communication Process 82

Networking Models 84
The Purpose of Models 84
The OSI Model 85
The DoD Model 97
Vendor-Specific Models 99

Networking Standards and Specifications 99
Why Standardize? 100
Standards-Setting Bodies 100

Summary 104

Further Reading 104

Review Questions 105

Chapter 4 Networking Communications Methods 109

Signaling Methods and Characteristics 109
Analog and Digital 109
Baseband and Broadband 112
Multiplexing 113
Asynchronous and Synchronous Transmission 115
Simplex, Half-Duplex, and Full-Duplex Transmission 116

Signaling and Communications Problems 118
Electromagnetic Interference 119
Radio Frequency Interference 119
Crosstalk 119
Attenuation 120
Bandwidth Capacity Issues 121

Media Access Methods 121
CSMA/CD 122
CSMA/CA 123
Token Passing 123
Demand Priority 125

Summary 126

Further Reading 126

Review Questions 127

Facebook's Exhibit No. 1017/1117
Page 5

Chapter 5 LAN Links 131

Ethernet 132
10Base2 132
10Base5 134
10BaseT 136
100BaseX 137
1000BaseT 137
The Structure of an Ethernet Frame 138
Rules of Ethernet Engagement 139
Summary of Ethernet Characteristics 142

Token Ring 142
Token Ring Topology 143
The Token Ring Communication Process 143
Token Ring Hardware Components 144
Advantages of Token Ring 145
Disadvantages of Token Ring 145
The Structure of the Token Ring Frame 146
Rules of the Ring 147
Summary of Token Ring Characteristics 147

FDDI 147
How FDDI Works 147
FDDI Specifications 148
Advantages of FDDI 149
Disadvantages of FDDI 149
The FDDI Frame Structure 149
Summary of FDDI Characteristics 149

AppleTalk 150
AppleTalk Specifications 150
How AppleTalk Works 150
Advantages of AppleTalk 151
Disadvantages of AppleTalk 151
LocalTalk Data Transmission 151
Summary of AppleTalk Characteristics 151

ARCnet 151
How ARCnet Works 151
ARCnet Specifications 152
Advantages of ARCnet 153
Disadvantages of ARCnet 153
The ARCnet Packet Structure 153
Summary of ARCnet Characteristics 153

Comparing Networking Architectures 154

Summary 154

Further Reading 155

Review Questions 155

Chapter 6 WAN Links 159

WAN Hardware 160
Modems 160
ISDN and DSL Adapters 165
Customer Premises Equipment 165

WAN Topologies 166
The Point-to-Point WAN 166
The WAN Ring 167
The WAN Star 168
Multitiered WANs 169

Network Switching Types 170
Circuit-Switching Networks 170
Packet-Switching Networks 176

Emerging WAN Technologies 178
OC-SONET 179
Broadband ISDN 179
CATV 179
SMDS 181
Wireless WAN 181

LAN/WAN Connectivity 182
Translated Connections 182
Proxy Servers 185
Routed Connections 186

Summary 187

Further Reading 188

Review Questions 188

Part II **Networking Hardware and Software 193**

Chapter 7 Physical Components of the Network 195

NICs 195
The Role of the NIC in Network Communications 195
Selecting a NIC 196

Facebook's Exhibit No. 1017/1117
Page 7

Configuring and Using a NIC 197

Network Media 200
Cable Types 200
Wireless Media 207

Network Connectivity Devices 210
Simple Connectors 211
Complex Connectors 213
Segmenting and Subnetting Devices 214

Summary 222

Further Reading 222

Review Questions 222

Chapter 8 Networking Protocols and Services 227

NetBIOS/NetBEUI 227

IPX/SPX 229
The Network Layer Protocol: IPX 229
The Transport Layer Protocol: SPX 230

TCP/IP 231
The TCP/IP Suite 231
The Network Layer Protocol: IP 231
The Transport Layer Protocols: TCP and UDP 245
Addressing the Envelope: Packet Headers 248
Name Resolution 249
TCP/IP Utilities 254
Application Layer Protocols 261

Summary 262

Further Reading 262

Review Questions 263

Chapter 9 The Widest Area Network: The Global Internet 267

The Evolution of the Internet 267
The Development of the Backbone 268
The Internet2 Project 269

The Components of the Internet 269
The Local Computer or LAN 270
The ISP 270
The Regional Network 270
NAPs 271

MAEs 271
How Internet Components Work Together 272

What the Internet Does 273
The World Wide Web 274
E-mail and Mailing Lists 283
Newsgroups 287
File Transfer 289
Telnet 290
Streaming Media 291
Live Chat 291
Audio/Videoconferencing 292
Internet Telephony 292
Virtual Private Networking 293

TCP/IP Routing and the Internet 293
How IP Routing Works 294
An Example of a Simple Routed Network 294
Types of Routing Interfaces 296
Static Versus Dynamic Routing 296
Distance-Vector Versus Link-State Protocols 298
Common Routing Protocols 299

Who Owns the Internet? 301
ISOC 302
IAB 302
IETF 302
IESG 302
IANA/ICANN 302
W3C 302

Summary 303

Further Reading 303

Review Questions 304

Chapter 10 Network Operating Systems 307

General Network Administration 307
The Client/Server Environment 309
Sharing Network Resources 311

Overview of NOSs 320
Windows NT and Windows 2000 Networks 320
NetWare Networks 326
UNIX and Linux Networks 329
Other NOSs 334

Facebook's Exhibit No. 1017/1117
Page 9

Summary 335

Further Reading 336

Review Questions 336

Chapter 11 Directory Services 341

What Are Directories and Directory Services? 341
What Is a Directory? 341
What Are Directory Services? 343

Directory Services Standards 346
X.500 346
DAP and LDAP 347

Directory-Enabled Networking 349

Popular Directory Services 349
Novell NDS 349
Microsoft Active Directory 350
Other Directory Services 354

Summary 356

Further Reading 357

Review Questions 357

Chapter 12 Desktop Operating Systems 361

Operating System Basics 361
Operating System Interfaces 362
Using Commands 364
Files and File Systems 367

Common Desktop Operating Systems 379
MS-DOS and Windows 3.*x* 379
Windows 9*x* 381
Windows NT Workstation 388
Windows 2000 Professional 392
Linux/UNIX 396
Macintosh 401
OS/2 403

Summary 404

Further Reading 404

Review Questions 405

Chapter 13 Hybrid Networks 409

Characteristics of the Hybrid Network 409
Inability of a Single Vendor to Provide All Desired Features 410
Personal Preferences of Users 410
Budgetary Factors 410
Haphazard Growth 411

Multiple-Protocol Networks 411
Network/Transport Protocols 411
File-Sharing Protocols 415

Multiple-Operating-System Networks 415
Multiple Server Operating Systems 415
Multiple Client Operating Systems 417
Multiple Server and Multiple Client Operating Systems 417

Multiple-Platform Networks 417
PC-to-Macintosh Communications 418
PC-to-Mainframe Communications 418
PDA-to-PC and Handheld-to-PC Communications 419

Gateway: The Hybrid Connectivity Solution 419
Windows-to-NetWare Redirectors 420
Cross-Platform Solutions 420
SNA 421
Samba 422

Summary 424

Further Reading 425

Review Questions 425

Part III **Network Specialty Areas 429**

Chapter 14 Protecting the Network 431

Network Security 431
Assessing Security Needs 432
Assessing Security Threats 434
Implementing Security Measures 441
How Security Components Work 448
Advanced Identification and Authentication Technologies 454
Developing Security Policies 457

Disaster Protection and Recovery 465
Power Backup 465
Data Backup 466

Facebook's Exhibit No. 1017/1117
Page 11

Disk Fault Tolerance 469
Clustering Technologies 471

Summary 471

Further Reading 472

Review Questions 473

Chapter 15 Remote Access 477

Why Remote Access? 478
Branch Offices 478
After-Hours Connectivity 478
Telecommuting 479
Mobile Users 480
Providing Access to Clients and Partners 480

How Remote Access Works 481
Protocols Used for Remote Access 482
Remote Access Authentication 482
Assignment of IP Addresses 483
Aggregation of Bandwidth on Dialup Connections 483
Control of Bandwidth Usage 484

Remote Access Connectivity Devices 484
Modems 484
ISDN Terminal Adapters 492
Cable Modems 493
CSU/DSUs 494

Configuring Remote Access Clients and Servers 495
Configuring a Remote Access Client 495
Configuring a Remote Access Server 496

Remote Access Security Issues 496
Callback Security 497
RADIUS 498
Remote Access Policies 498
Account Lockout 499
Security Hosts 499

Summary 499

Further Reading 500

Review Questions 501

Chapter 16 Virtual Private Networking 505

What Is a VPN? 505
Virtual Networking 505
Private Networking 506

How VPNs Work 506
Digging the Tunnel 507
Operating System Support for VPNs 509

Why Use Virtual Private Networking? 510
VPN Versus Dialup Networking: Advantages and Disadvantages 510
VPN Scenarios 512

VPN Protocols 516
Tunneling Protocols 516
Encryption Protocols 519
LAN Protocols 520

VPN Security 520
Authentication 521
Authorization 521
Encryption 521

VPN Performance Issues 521

Types of VPNs 522
Software-Based VPNs 522
Hardware-Based VPNs 522

Configuring a VPN Connection 522

Summary 525

Further Reading 526

Review Questions 526

Chapter 17 Thin Client Networking 531

The Evolution of Thin Client Networking 532
Thin Client Technology 533
Advantages of Thin Client Technology 534

Thin Client Protocols 535
RDP 536
ICA 536
X and X Display Manager Communication Protocol (XDMCP) 536
RFB 537
BOOTP, DHCP, and TFTP 537

Facebook's Exhibit No. 1017/1117
Page 13

Thin Client Hardware 538
WBTs 539
Network Computers 539
Net PCs 540
Desktop Computers 540
The Thinnest Clients: Handheld PCs 540

Thin Client Software 541
Microsoft Terminal Services 541
Citrix Winframe/MetaFrame 542
The X Window System 543
Web-Based Computing 544
The JVM 544

ASPs 545
Microsoft .NET 545

Summary 546

Further Reading 546

Review Questions 547

Chapter 18 Monitoring, Management, and Troubleshooting Tools 551

Analyzing and Optimizing Network Performance 551
Bottlenecks 552
Baselines 553
Best Practices 554
Determining Internet Connection Speed 554

Network Monitoring and Management Tools 556
Networking Monitoring Software 556
Network Management Software 562
Management Software for Small and Medium-Sized Networks 567
Management Service Providers 568

Hardware Monitoring and Troubleshooting Devices 568

Troubleshooting Network Problems 569
Troubleshooting Basics 569
Using Operating System Log Files 571
Using TCP/IP Utilities 573
Problem-Solving Guidelines 579

Summary 580

Further Reading 581

Review Questions 581

Part IV **The Future of Networking 585**

Chapter 19 Tomorrow's Technologies 587

Ubiquitous Computing 587
Bringing Networking Home 588
Overcoming the Limits of IP 589
New Directions in Networking Technologies 590

Universal Connectivity 592
"Smart" Everything 593
Networking the Family 594
That's Entertainment 594
Privacy Issues: Big Brother Is Watching 594

Networking at Work 595
The Impact of Networking Technologies on Government 596
The Impact of Networking Technologies on Law 598
The Impact of Networking Technologies on Medicine 599
The Impact of Networking Technologies on Publishing 600

New Ways of Learning 601

Artificial Intelligence 602
Computers That Think 602
Cybernetic Life-Forms: The Ultimate Network 603
